

Econometrics Stata Lab: Introduction to Stata

ECON 2228

Suraj Kumar

Boston College

September 24, 2026

- ▶ ECON2228: Econometrics Stata Lab
 - ▶ Use Stata for econometrics analysis (*regression*), data manipulation (filtering, joining), and interpreting and presenting results (*plotting*).
 - ▶ 12-week course. *slow at the beginning, but plan to ramp it up. Let me know we can design it together.*
 - ▶ Logistics: Office Hours - 3 pm to 4 pm on Friday at Maloney - 340-E. If the time, doesn't work for you, please let me know. We can schedule a different time.

- ▶ **Current:** PhD student in Economics at BC, third year, working on macroeconomics and international finance.
- ▶ **Past:** worked at the Reserve Bank of India (*India's FED*), Goldman Sachs, American Express, and Credit Suisse. Background in engineering (*an Engineer in the guise of an Economist*).
- ▶ **Feedback:** I'm very open and eager to learn with you.

About You

- ▶ Which year are you in?
- ▶ What is your major? minor?
- ▶ Where are you from? (city, country)
- ▶ What is your background in econometrics and statistics?
- ▶ What do you want to learn in this course?
- ▶ Any concerns about AI?

- ▶ **Guiding Principle 1:** Human skills (*that I care about*) should not depreciate with AI.
 - ▶ **Economist:** Understanding data, methods (regressions), results (inference), and policy implications.
 - ▶ *Offload to AI:* importing data from several file types, syntax – data filtering, plotting.
- ▶ **Guiding Principle 2:** Humans should remain in the driving seat, not in the passenger seat. *Easy to say, hard to implement, coding style mismatches. Example: My coding project. Why - time constraints, and AI feel of super productivity*

Tell me how the course is going

- ▶ Anonymous, about 1 minute, all questions optional.
- ▶ Pick the week, your section, and rate the pace.
- ▶ Fill it in once for each week, if you like.
